- **Who needs it:** most diesel and alternative-fuel vehicles over 14,000 lbs GVWR that operate in California.
- **Testing is twice a year** for most trucks today. Starting October 1, 2027, most trucks with OBD systems will need to be tested **4 times a year**. See fleet plans on page 2.
- **CARB annual fee is separate:** the yearly compliance fee is paid by the owner directly to CARB through CTC-VIS and is not part of our price.
- **Available 24/7:** early mornings, nights, and weekends to keep your trucks on the road.
